[coderdiaz](#)

What is Vue?

A progressive framework for building user interfaces

Characteristics

Approachable

Versatile

Performant

- 1. Declarative & Reactive Rendering**
- 2. Component Oriented Architecture**

HTML

```
<div id="demo">  
  <h1>{{msg}}</h1>  
</div>
```

JavaScript

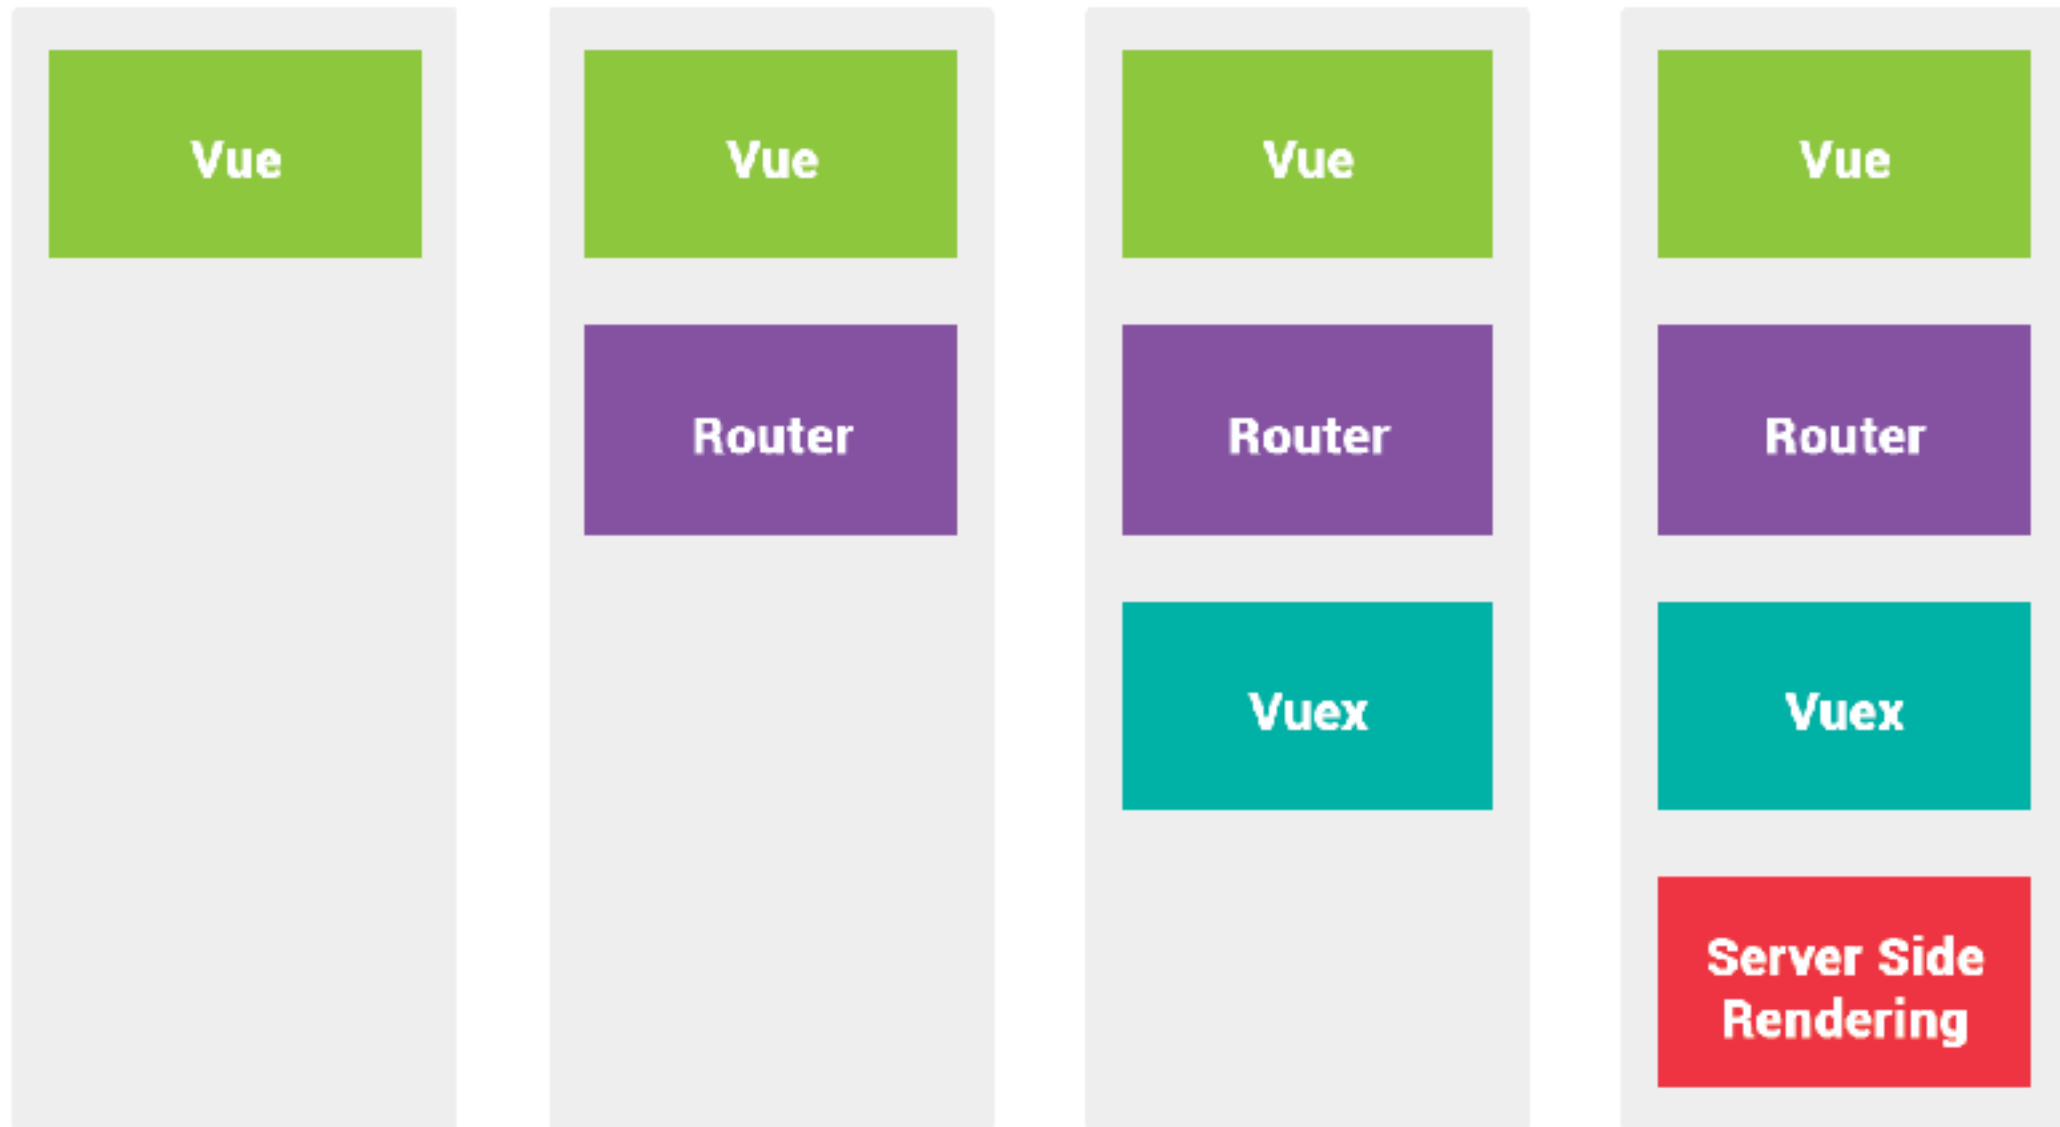

```
var vm = new Vue({  
  el: '#demo',  
  data: {  
    msg: 'Hello Vue.js!'  
  }  
})
```

<https://github.com/vues-team/who-use-vuejs-in-mexico>

Can include functionality progressively

Components

Web as a component tree

Registering a global component

```
Vue.component('my-component', {  
  props: ['msg'],  
  template: '<p>{{msg}}</p>'  
})
```

Registering a single component

```
<template>  
  <h1>{{msg}}</h1>  
</template>
```

```
<script>  
export default {  
  name: 'NameComponent',  
  data: {  
    msg: 'Hello Vue.js!'  
  }  
}  
</script>
```

```
<style lang='sass'></style>
```

NameComponent.vue

Directives

v-if

```
<div id="demo">  
  <h1 v-if="showElement">{{msg}}</h1>  
</div>
```

v-show

```
<div id="demo">  
  <h1 v-show="showElement">{{msg}}</h1>  
</div>
```

v-for

```
<div id="demo">  
  <h1 v-for="post in posts">{{post.title}}</h1>  
</div>
```

```
var vm = new Vue({  
  el: '#demo',  
  data: {  
    posts: [  
      {  
        title: "Welcome to Vue"  
      }  
    ]  
  }  
})
```

v-model

```
<div id="demo">  
  <input type="text" v-model="name">  
</div>
```

```
var vm = new Vue({  
  el: '#demo',  
  data: {  
    name: ''  
  }  
})
```

Let's play with Vue
